

Guideline S5.3.30

APAC provides the following guidance regarding interpretation of Standard 5.3.30 (June 2010):

Placements can be paid or unpaid.

Placement in any one workplace cannot exceed 33% of the total course placement requirements.

The reference to “any workplace” means any one particular workplace. A workplace is defined as a specific worksite or physical location. Multiple placements can occur within the one organization as long as no two placements in the organization occur within the one workplace and each of the placements requires distinctly different work experiences.

The remaining elements of the Standard continue to apply as stated.
